Header: The Rare Gem of East African Botanicals

Unlike traditional, hard West African shea butter, Zuri Nilotica is cold-pressed from the nuts of the *Vitellaria paradoxa ssp. Nilotica* tree native to Northern Uganda. Naturally rich in essential fatty acids and vitamins A & E, it delivers intense moisture without clogging pores or leaving a heavy residue.

Unrefined, fragrance-free, and ethically harvested, every jar preserves its natural, light nutty aroma and creamy softness. Use daily to restore dry skin, soothe irritation, and seal in deep moisture from head to toe.

Sensory Profile Highlights:

- **Texture:** Soft, silky balm (no heating or whipping required)
- **Absorption:** Fast-absorbing, non-greasy finish
- **Scent:** Light, naturally sweet & nutty (100% unrefined)

 MEDIA ASSETS & DESIGNER PLACEMENT

- **Image 1 (Main Gallery):** Studio jar photo showing product texture inside.
- **Image 2 (Macro Detail):** Close-up showing smooth consistency.
- **Video Clip 1 (5s Loop):** Demonstration video showing application on dry skin with a radiant finish.

Placement Note: Position sensory badges directly beneath size buttons using minimalist vector line icons in Soft Gold (`#D4A373`).

SECTION 3: COMPARISON (THE NILOTICA ADVANTAGE)

Design & Styling Specs:

- **Background:** Soft Sand (`#F4EBE1`).
- **Table Headers:** Primary Serif | 14px | Bold | Background: Deep Earth (`#582C12`) | Text: Pure White (`#FFFFFF`).
- **Table Body Font:** Sans-Serif | 13px | Regular | Alternating Rows: `#FFFFFF` and `#FAFAFA` | Border: `#E5D5C5`.
- **Zuri Nilotica Highlight Column:** Text bolded in Deep Earth (`#582C12`) with subtle Soft Gold (`#D4A373`) vertical left border.

 VISUAL BANNER ASSET

Image Asset: Side-by-side split photo showing hard/crumby West African shea on the left vs. smooth, creamy Zuri Nilotica on the right. Place directly above table.

FEATURE	STANDARD WEST AFRICAN SHEA	ZURI NILOTICA SHEA
Origin	West Africa (<i>Vitellaria paradoxa</i>)	Northern Uganda (<i>ssp. Nilotica</i>)
Texture	Firm, dense, waxy, often crumbly	Soft, silky, melts on contact with skin
Fatty Acid Profile	High in Stearic Acid (harder feel)	High in Oleic Acid (superior spreadability)
Absorption	Takes longer to sink in; heavy layer	Absorbs rapidly with a weightless finish
Natural Aroma	Strong, distinct smoky/earthy scent	Light, subtle, naturally sweet nutty aroma

SECTION 4: ETHICAL SOURCING & PURITY GUARANTEE
